Views from church tower

The church tower is largely hidden by trees for most of the year. The photographs show two views from the top of the church tower

1 looking towards Coles Road.

2 Towards Queen Anne Lodge.

3 The roof of the church tower is reached by a long wooden ladder, to the first level, where the clock is located. (The clock, which replaced an earlier one, was made by a blacksmith in 1848. It was purchased with £50 given by Great Eastern Railway in return for parish land, the embankment of Bankers Ditch, required by them.)

4 Then up another short ladder to the level with the bells. There were 3 bells in 1552 and a fourth was added in 1926. It is then necessary to climb over the wooden bell frame, up a further ladder, and through a small hatch onto the roof.
